PULSAR Mobile Specs

ACTi Camera

The force multiplier system enhances patrol efficiency by enabling officers to collect vehicle and license plate data while performing other duties. Captured vehicle analyses are instantly displayed on an in-car tablet or MDT, ensuring that officers have immediate access to crucial information. Hotlist alerts are also instantly shown on these devices, allowing for rapid response to flagged vehicles. The versatile setup options allow cameras to capture vehicles on either side of the patrol vehicle, as well as in front and behind, providing comprehensive coverage and maximizing situational awareness.

- Camera:**
- Dimensions – 4.7” x 2.3” x 1.9”
 - Weight – 344 g
 - IP67
 - Lens – 12mm
 - Resolution – 2MP at 1920x1080

- Capture Details:**
- Daytime Range – up to 45 ft
 - Nighttime Range – up to 30 ft
 - IR 850nm
 - Coverage - two lanes of traffic (26 ft)

Recognition Details:

- Date/Time, GPS location
- License plate, Issuing State, Make, Model, Color, Vehicle Type

Power:

- PoE Class 3
